DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Montanari et al '990.

Montanari et al teach a method for tracking the production history of food products which is similar to the Applicant's claimed method for harvesting portions of an animal. More specifically, the method includes separating the carcass into various parts, as seen in Figure 6, having at least a first portion and a second portion. The first and second portions are transporting toward a respective harvesting point. The support means for the first portion and second portion are correlated such that the first portion and the second portion are positively identified as originating from said animal carcass. Throughout the packing process, the carcass portions are inspected to determine whether or not said first portion or said second portion meet a predetermined standard. Regarding claims 2 and 4, the first and second portions are transported on separate processing lines, wherein each processing line is operated independently of one another. Montanari et al a series of detection points throughout the processing lines to identify the source and origin of contamination. Upon detection of a parameter that does not meet the predetermined standard, then the computer control apparatus will not allow the food portions to be shipped. In regards to claims 13 and 14, various types of

animals can be used with the system and method according to Montanari et al. In that, the bar codes are able to be placed onto any type of carcass and related portions.

Conclusion

Summary: Claims 1-16 have been rejected.
